Foot-strike cushioning
 Colour-defined buffer zone aligned to the pressure patterns on a runner's feet gives added cushioning.

Wide arch support
 The band that holds the sock in place to prevent 'bunching' and to give a supportive, stable feel.

Split-toe design
 Adds extra cushioning under the big toe to improve comfort as runners land, transition and accelerate through each stride.

Anatomical left and right
 Socks are designed specifically for the left and right foot to provide a natural fit.
